Research By Members Column

Commencing in the September/October issue, *JCST* will have a new section, entitled Research By Members. This column will carry the titles and abstracts of research reports done by NSTA and SCST members. Abstracts should be limited to 100 words. Our goal is to encourage communication among members about interesting work they are doing, whether published or unpublished.

Materials contributed to this column should comply with *JCST*'s manuscript preparation guidelines, which appear in the *Journal* every fall and are available from the Washington editorial office. Three copies of all submitted materials should be sent to the Washington editorial office at NSTA headquarters and one copy to the editor at Stony Brook.

"Research Experiences for Undergraduates Program in the Department of Physics at North Carolina State University." Michael A. Paesler. D/J 201

Instructional Media Editor

JCST is looking for nominations to fill the position of editor of the Instructional Media department. Self-nominations are welcome. To nominate a colleague or yourself, send a vita, statement of interest outlining qualifications, and a writing sample (preferably evaluating media) to Professor Lester G. Paldy, Director, Center for Science, Mathematics, and Technology Education, State University of New York at Stony Brook, Stony Brook, NY 11794-3733.
